How the Program Works

1. Check is mailed directly to service provider
2. Client calls service provider directly
3. Equipment is repaired
4. Paperwork is submitted to Remi for payment
5. Paperwork is reviewed & processed
6. Equipment repair or maintenance required

Program Benefits:

**Cost Reduction**
Reduces equipment maintenance expenditures by 25% compared to conventional service contract pricing.

**Singular Contract**
Consolidates all of your current service contracts into ONE comprehensive program, eliminating the high costs and inefficiencies of multiple vendor service contracts.

**Life Cycle Management**
Manages the maintenance of the equipment portfolio guaranteeing decreased cost, increased equipment uptime and extended useful life expectancy.

**Choice of Service Vendor**
Works with national and local service companies. This gives you the ability to use your preferred service vendor or choose vendors based on responsiveness, customer service, and quality, ensuring that you are receiving the highest level of service available.

**Guaranteed Budget**
Solidifies your maintenance budget and protects your investment by providing a “capped cost” solution.

Four Easy Steps to Get Started on the Remi Program:

1. Remi will perform a detailed analysis of your current equipment maintenance agreement.
2. To receive a proposal outlining what we can do for you, send copies of the following documentations to Remi:
   - Copies of actual service contracts with current pricing and terms & conditions. This will allow us to match the customized coverage's you currently have on each piece of equipment and provide you with an accurate quote.
   - If you do not have service contracts, a list of all the equipment you would like quoted with the manufacturer and model numbers, item number, serial number, purchase number, and location.
3. Remi will analyze your current service contracts and equipment coverage provisions.
4. Remi will develop a proposal specifying cost savings, coverage and detailed equipment schedule.

Types of Equipment Covered

Research Laboratory
- Analyzers
- Autosamplers
- Centrifuges
- Chromatography Systems
- CO-oximeters
- Densitometers
- DNA Extractors
- DNA Synthesizers
- Electron Microscopes
- Fluorometers
- Flow Cytometers
- Freezers
- Gamma Counters
- Histology Equipment
- Lasers
- Mass Spectrometers
- Microplate Reader
- Microscopy (SEM/TEM)
- MRI Scanners
- Particle Counters
- PCR Detection
- Physiological Monitoring
- Portable X-Ray Machines
- Projectors
- Scintillation Counters
- Sequencers
- Special Procedure Rooms
- Spectrophotometers
- Tissue Processors

Medical & Surgery
- Angiographic Systems
- C-Arms
- Cardiology Equipment
- Cell Savers
- Chest Units
- Cystology Units
- Defibrillators
- Dental Units
- Dose Calibrators
- Fluoroscopic Systems
- Gamma Cameras
- Radiographic Equipment
- Laser Imagers
- Mammography Units
- Mobile ECG
- Mobile X-Ray Machines
- MRI
- Film Viewers
- Nuclear Medicine Cameras
- PACS
- Phacoemulsifiers
- Physiological Monitoring
- Plethysmographs
- Pulmonary Function Devices
- Radiation Therapy
- Special Procedure Rooms
- Surgical Lasers
- Ultrasound Units

Communication
- Audio/Visual Systems
- Paging Systems
- Radios
- Telephone Systems
- Voice Mail Systems

Plus other types of equipment electronic in nature.
